

Model Provider	Model	Release date	Cutt off date	Cost of tokens	Contenxt window	Type	When to use this model	
Anthropic	Claude Opus 4.6	05/02/2026	August 2025	\$5.00 per 1 million input tokens and \$25.00 per 1 million output tokens	Features a standard 200,000 token limit and a 1 million token context window available in beta.	Most advanced frontier reasoning and agentic LLM	Tasks that require deep reasoning, advanced coding, or the analysis of massive documents	
Google	gemini-3-flash-preview	17/12/2025	January 2025	\$0.50 per million input tokens and \$3.00 per million output tokens	context window of up to 1,048,576 tokens	Multimodal "thinking" and agentic language model	when you need frontier-level reasoning but require maximum speed and cost efficiency	
Open AI	gpt-5.2	11/12/2025	August 2025	\$1.75 per million input tokens and \$14.00 per million output tokens	400,000-token context window	Advanced multimodal reasoning large language model	when you need a highly balanced, OpenAI frontier-tier model for production tasks, coding support, and multi-step reasoning without the slow latency of heavier models	
Moonshot AI	kimi k2.5	27/01/2026	January 2025	\$0.60 per 1 million input tokens and \$3.00 per 1 million output tokens	context window of 262,144 tokens (256K)	native multimodal, open-weight [1] Mixture of Experts (MoE) model	when handling complex, real-world tasks that require multitasking, parallel research, or native vision and text integration	
Zhipu AI	GLM-5.1	07/04/2026	NA	\$1.40 per million input tokens and \$4.40 per million output tokens	context window of 202,752 tokens	Built on a Mixture-of-Experts (MoE) architecture and It operates as an agentic AI foundation model	Autonomous software engineering, complex coding tasks, and multi-step agentic workflows	

Model Provider	Model	Release date	Cutt off date	Cost of tokens	Contenxt window	Type	When to use this model	
DeepSeek	deepseek v4	24/04/2026	May 2025	\$0.435 per million input tokens (cache miss) and \$0.87 per million output tokens	1-million-token context window	A native multimodal, open-weight Mixture of Experts (MoE) large language model	complex reasoning, agentic workflows, and long-context tasks	
Meta	Llama 5	08/04/2026	NA	Depends entirely on the third-party provider hosting the most recent open-weight Llama models	10 Millions token	multimodal Large Language Model (LLM). It is designed to process multiple data types, combining deep generative capabilities with frontier-class reasoning and tool-use	It combines open-weight architecture with multimodal processing, advanced reasoning, and native efficiency	
Mistral AI	Mistral Large 3	02/12/2025	NA	\$0.50 per 1 million input tokens and \$1.50 per 1 million output tokens	256k-token context window	sparse Multimodal Mixture-of-Experts (MoE) LLM	for demanding enterprise workloads that require advanced reasoning, complex coding, and multilingual or multimodal (text and vision) tasks.	
Alibaba Cloud's	Qwen 3.5	16/02/2026	2026	0.07 to \$0.10 for input and ~\$0.26 to \$0.40 for output	262,144 tokens	Open-weight (open-source) and proprietary multimodal models	Advanced coding, multi-language support (covering over 200 dialects), and native multimodal tasks like video and image understanding
